
Cationic Conditioner and Flocculent

CORCAT W84L is specially formulated to condition water containing phosphates for easy flocculation and eliminates the use of lime or other materials used as a source of calcium.

CORCAT W84L is an iron based proprietary mix priced to offer savings to the user, especially when using caustic for pH control can eliminate lime.

Dose rates are determined by amount of phosphates. Usually 5 mg/l of **CORCAT W84L** is used for each mg/l of phosphate. It is also useful for the reduction of copper, zinc, and nickel ions.

TYPICAL PROCESS

Appearance:	dark brown liquid
Specific Gravity:	1.36
Flash Point:	none
pH:	1.3 at 4% solution
Odor:	acid

HANDLING

Although **CORCAT W84L** can be diluted with water, we suggest meter pumping directly from drum to application pump. PVC or rubber should be used to prevent corrosion of pumps or other materials in contact with the material.

PRECAUTIONARY INFORMATION

Consult the product Safety Data Sheet for all safety and handling information prior to using this product.

WASTE DISPOSAL AFTER USE

Check your state, local and federal regulations on waste disposal to insure compliance before disposing of any Coral product. Consult Coral if you are not sure how to treat this product for waste disposal.

STORAGE

Check your local, state and federal regulations on chemical storage to insure compliance before receiving and storing Coral products. Generally, we recommend that users employ common sense storage precautions to protect their workers, first responders, facilities, sewers, and the environment from accidental spills and leaks of hazardous chemical products. Contact Coral for specific storage precautions not contained herein.
